DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Guest 4309870 that teaches the invention as disclosed and as claimed: a gas turbine¹² having a main lubricating oil pump 20 for the bearings (col. 1, ll. 43-44) and an auxiliary lubricating pump 30 powered by an electrical motor 42 and activated by a temperature sensor 54 anytime that the oil temperature is above a maximum acceptable temperature of say 190F (col. 3, l. 63), and the main pump 20 is off because the engine has been shut down (col. 3, ll. 32). Connecting motor 42 of pump 30 to a battery would have been obvious in shut-down situations when no electrical generator power would be available in such situations.
